INTRODUCTION: Federal Fiscal Operations

Budgetauthority usu ally takes the form of ap pro pri a tions that allow obligations to be in curred and pay ments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would other wise expire. These are counted as new budget authority in the fiscal year of the leg is lation in which thereappropriation act is included, regardless of when the amounts were originally appropriated or when they would other wise lapse.

Obligations generally are liquidated by the is su ance of checks or the disburse ment of cash—outlays. Obligations may also be liquidated (and out lays recorded) by the accrual of interest on public is sues of Treasury debtsecurities (including an increase in redemption value of bonds out standing); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Re funds of collections generally are treated as reductions of collections, whereas pay ments for earned-income tax credits in ex cess of tax li a bil i ties are treated as out lays. Out lays during a fis cal year may be for pay ment of obligations in curred in prior years or in the same year. Out lays, there fore, flow in part from unex pended bal ances of prior year bud get authority and from bud get authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of off setting collections.

Receipts are re ported in the ta bles as ei ther bud get receipts or off set ting col lec tions. They are col lec tions from the public, excluding receipts off set against out lays. These, also called govern mental receipts, con sist mainly of tax receipts (in cluding so cial in sur ance taxes), receipts from court fines, cer tain licenses, and de posits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. To tal Govern ment receipts are compared with to tal out lays in calculating the bud get sur plus or deficit.

Offsetting collections from other Government accounts or the pub lic are of a busi ness-type or mar ket-oriented na ture. They are class if ied as either collections credited to ap propriations or fund accounts, or off set ting receipts (i.e., amounts deposited in receipt accounts). The for mer nor mally can be used with out appropriation act by Con gress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as re im burse ments to ap propriations. For accounting purposes, earned reimbursements are also known as revenues. These off setting collections are netted against gross out lays in determining net out lays from such ap propriations; and (2) in the three types of revolving funds (public enter prise, intragovernmental and trust); off setting collections are netted against spending, and out lays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used with out appropriation. They are subdivided into three cate gories: (1) pro pri etary re ceipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental trans actions, or pay ments into receipt accounts from governmental appropriation or fund accounts.

They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts which in clude foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (ei ther Fed eral funds or trust funds) to a re ceipt ac count in the other fund group; (2) Fed eral intrafund trans ae tions—pay ments and re ceipts both oc cur within the Fed eral fund group; and (3) trust intrafundtrans actions—payments and re ceipts both oc cur within the trust fund group.

Off setting re ceipts are gen er ally de ducted from bud get au thority and out lays by func tion, subfunction, or agency. There are four types of re ceipts, how ever, that are de ducted from bud get totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by off-budget Fed eral entities) as em ploy ers into em ploy ees' re tire ment funds; (2) in terest received by trust funds; (3) rents and royalties on the Outer Con ti nen tal Shelf lands; and (4) other in ter est (i.e., that col lected on Outer Con ti nen tal Shelf money in deposit funds when such money is trans ferred into the bud get).

The Gov ern ment has used the uni fied bud get con cept set forth in the "Re port of the Pres i dent's Com mis sion on Bud get Con cepts" as a foun dation for its bud get ary analy sis and presentation since 1969. The concept calls for the bud get to in clude all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted re moving several Federal entities from (or creating them out side of) the bud get. Other laws have moved certain off-budget Federal entities onto the bud get. Under current law, the off-budget Federal entities con sist of the two Social Security trust funds, Federal Old-Age and Survivors In sur ance and the Federal Dis ability In sur ance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, out lays, and sur plus or deficit or dinarily are not subject to tar gets set by the Con gres sional resolution, the Bal anced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforce ment Act of 1990 (2 United States Code 900-922)] in cluded off-budget sur plus or deficit in calculating deficit tar gets under that act and in calculating excess deficit. Partly for this reason, at tention has focused on both on- and off-budget receipts, out lays and deficit of the Government.

Tables **FFO-1**, **FFO-2** and **FFO-3** are pub lished quarterly and cover 5 years of data, es ti mates for 2 years, de tail for 13 months, and fis cal year-to-date data. They pro vide a sum mary of datarelating to Federal fiscal operations reported by Federal entities and dis burs ing of fi cers, and daily re ports from the FRBs. They also de tail ac count ing trans actions affecting receipts and out lays of the Gov ern ment and off-budget Federal entities and their related effect on as sets and liabilities of the Government. Data are derived from the "Monthly Trea sury State ment of Receipts and Out lays of the United States Gov ern ment."

- Table **FFO-1** sum marizes the amount of to tal receipts, out lays, and sur plus or deficit, as well as trans actions in Federal securities, monetary as sets and balances in Treasury operating cash.
- Table **FFO-2** in cludes on- and off-budget re ceipts by source. Amounts represent income taxes, social insurance taxes, net con tri butions for other in surance and retire ment, excise taxes, es tate and gift taxes, cus toms du ties and net mis cellaneous receipts.
- Table FFO-3 details on- and off-budget outlays by agency.
- Table **FFO-4** sum marizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.

• Table FFO-5 sum marizes internal revenue receipts by regions and districts and by type of tax. Amounts reported are collections made in a fis cal year. They span several tax liability years be cause they consist of prepay ments (estimated tax pay ments and taxes with held by employers for in dividual income and Social Security taxes), pay ments made with tax returns and subsequent pay ments made after tax returns are due or are filed (that is, pay ments with de lin quent returns or on delin quent accounts).

Amounts are re ported based on the pri mary fil ing ad dress pro vided by each tax payer or re port ing en tity. For multistate cor po ra tions, the ad dress may re flect only the district where such a cor po ra tion re ported its taxes from a prin ci pal of fice rather than other districts where in come was earned or where individual income and So cial Se cu rity taxes were with held. Second-Quarter Receipts

The following cap sule analy sis of budget receipts, by source, for the second quarter of fis cal 2000 supple ments fis cal data re ported in the March is sue of the "Trea sury Bulle tin." At the time of that is sue's release, not enough data were avail able to an a lyze ade quately collections for the quarter.

In di vid ual in come taxes—Individual in come tax receipts, net of re funds, were \$201.8 bil lion for the sec ond quar ter of fis cal 2000. This is an in crease of \$8.7 bil lion over the comparable prior year quar ter. With held receipts in creased by \$19.8 bil lion and non-withheld receipts in creased by \$5.6 bil lion during this period. Refunds in creased by \$16.7 bil lion over the comparable fis cal 1999 quar ter. There was an in crease of \$0.5 bil lion in accounting adjustments between individual income tax receipts and the So cial Se cu rity and Medicare trust funds over the comparable quar ter in fis cal 1999.

Corporation income taxes—Net cor po rate in come tax receipts were \$31.4 bil lion for the sec ond quar ter of fis cal 2000. This is an in crease of \$6.5 bil lion com pared to the prior year sec ond quar ter. The \$6.5 bil lion change is com prised of an increase of \$5.6 bil lion in es ti mated and fi nal pay ments, and a decrease of \$0.9 bil lion in cor po rate re funds.

Employment taxes and contributions—Employment taxes and con tri butions receipts for the second quarter of fis cal 2000 were \$159.2 bil lion, an in crease of \$13.2 bil lion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by \$7.9 bil lion, \$2.3 billion, and \$3.0 billion respectively. There was a -\$0.2 bil lion ac count ing ad just ment for prior years employ ment tax li a bil i ties made in the sec ond quarter of fis cal 2000, while there was a \$0.3 billion adjustment in the second quarter of fiscal 1999.

Unemployment insurance—Unemployment insurance re ceipts, net of re funds, for the sec ond quar ter of fis cal 2000 were \$3.9 bil lion, an in crease of \$0.2 bil lion over the compara ble quar ter of fis cal 1999. Net State taxes de pos ited in the U.S. Trea sury in creased by \$0.2 bil lion to \$2.8 bil lion. Net Federal Unemployment Tax Act (FUTA) taxes did not change significantly from \$1.1 bil lion.

Con tri bu tions for other in sur ance and re tire ment— Contributions for other retirement were \$1.2 bil lion for the second quarter of fiscal 2000, an increase of \$0.1 billion over receipts from the comparable quarter of fiscal 1999. The growth in con tri bu tions will re main rel a tively flat over the next few years as the num ber of em ploy ees cov ered by the Fed eral Employees' Re tire ment System (FERS) grows slowly relative to those covered under the Civil Service Retirement System (CSRS).

Excise taxes—Net excise tax receipts for the second quarter of fis cal 2000 were \$16.1 bil lion, an in crease of \$1.5 bil lion over the com parable prior year quarter. To tal excise tax re funds for the quarter were \$0.5 bil lion, not a significant change over the com parable prior year quarter.

Estate and gift taxes—Net es tate and gift tax re ceipts were \$6.3 bil lion for the sec ond quarter of fis cal 2000. These receipts represent an in crease of \$0.3 bil lion over the same quarter in fis cal 1999.

Customs duties—Customs duties net of refunds were \$4.3 bil lion for the sec ond quar ter of fis cal 2000. This is an in crease of \$0.1 bil lion over the comparable prior year quarter.

Miscellaneous receipts—Net mis cella neous receipts for the sec ond quarter of fis cal 2000 were \$9.5 billion, an increase of \$1.6 billion over the comparable prior year quarter. This change is due in part to de posits of earnings by Federal Reserve Banks in creasing by \$0.6 billion.
